4.3.6 Institutional LMS

The institution engages LMS for providing the e-learning platform to the students and faculty. The features of LMS are best exploited for making it as a major teaching-learning tool to disseminate knowledge to our students. Various steps are taken by the institute to transition from conventional/traditional classroom into an e-learning environment. This is achieved by regularly organizing webinars on zoom, goggle meet and encouraging them to utilize e-learning resources by providing Wi-Fi facility, ICT enabled e-classrooms. Faculty uploads the lecture material into google drive and provides students link to these documents through mail or whatsapp. Audio visual presentations, Internet facility is provided to all the departments and faculty is encouraged to use and download latest information so as to use ICT enabled teaching practices by all the faculty members. We have separate whatsapp groups for 1st to 4th year BDS and PG groups which consists of all faculty and class representative where google meet or Zoom meeting links are uploaded on regular basis for online lectures or presentations according to the academic schedule.
